### VILLAGE MEETING ADJOURNED AGAIN

Accepted Water Committee's Reports, But Transacted No Other Business in Session of 2 1-2 Hours

RESOLUTION TO WAIT FOR MR. CROWELL VOTED DOWN

After jangling two and one-half hours the adjourned village meeting to act on the report of the water committee and on the question of municipal ownership adjourned again at 10.30 Tuesday night, having accomplished nothing further than Asix or eight-inch main from Westthe adoption of the two reports which

were presented two weeks ago.

It was a meeting marked at times by confusion and disorder, especially while the one builot which was cast was being taken, and it was enlivened occasionally by warm arguments. The "get together" spirit was lacking, and the general effect of the proceedings was like that of a man who starts for a straightaway race, but who starts for a straightaway race, but wanders around in a circle and stops where he started. At times the presentation was farcical, and a stranger within the gates would have formed a curious idea of what a village meeting is.

About 400 were present at 8 o'clock when Mayor Galvin rapped to order and Clerk Perry read the call. After a little delay Mr. Galvin turned the gavel of authority over to Brilliff Gordon. Mr. Gal-

thority over to Balliff Gordon. Mr. Gal-vin wished to take the floor to present resolutions and make remarks.

George L. Dunham moved that the re-ports of the water committee be accepted, saying that he understood that a vote of acceptance simply took the reports from the committee and had no binding effect on the village. J. L. Martin agreed with this view and the vote of acceptance was

When the question of municipal ownership was called Mr. Galvin offered the following resolution and moved its adop-

"Whereas, the legislature of the state of Vermont, by Act No. 117, approved Nov. 22, 1892, authorized the village of Brattleboro to construct or purchase a water system for the use of the inhab-itants thereof, therefore be it

by said incorporated village, in case it can be acquired at a reasonable cost."

L. F. Adams thought the village was not prepared to take such important action and said he hoped the resolution would not prevail. Mr. Galvin said the water committee had already spent \$500 in investigating and the time for action was now. He spoke of the costs of the various supplies which are available. R. S. Childs was in favor of having Mr. Crowell finish his system, and then if it is not sufficient, he said, the village can ahead and get an additional supply. J. L. Martin thought the only course was for the village to find out whether they wanted to own their system, and if they ant it then to go ahead to see what they

was strongly carried in the af-C. C. Fitts, as attorney for Mr. Crowell, wished the voters to differentiate be-tween deciding on the question of muni-

cipal ownership and specific action.

William H. Vinton, chairman of the water committee, then read the following letter from Mr. Crowell:

Brattleboro, Vt., Dec. 18, 1905.
W. H. Vinton, Esq.,
Chairman Water Committee,
Village of Brattleboro, Vt.

At the request of your committee, I had my counsel, Mr. Fitts, confer with you last Saturday evening, and I now want to state in writing what I under-stood he said orally to your committee

My plan for developing and perfecting the water supply in Brattleboro, is this: I control four feet in depth of the water of Marlboro North pond, a storage which the engineers estimate at 120,000,000 gallons. I have already contracted and bought the materials to construct a dam on Stickney brook at a point of sufficient altitude to run the water from thence into Pleasant valley in Brattleboro, and to lay a 12-inch pipe from thence to the upper end of Pleasant valley, to take the water of Stickney brook and to turn the britance of Stickney brook and to turn t into the Pleasant valley brook in Brattieboro. The contract also covers the putting in of a small dam or head works at the Atkinson farm, in Pleasant valley, and laying a 16-inch pipe from thence to connect with the six-inch main of the Chestnut Hill Reservoir company, near the dwalling house of Samuel Sargest or the dwelling house of Samuel Sargent on the main road above West Brattleboro. This work is now well under way. This contract includes taking care of the drainage from the Carpenter farm, and laying a sewer the entire length of the north side of Marlboro North pond, to take the sewage from the cottages there into a cess pool, which plan has been approved by the State Board of Health. A large part of this work is expected to be completed this fail or early winter, and the balance of it in the early spring.

My plans for the coming spring are to complete the development of this new water supply as follows: To add to the dam at the Atkinson farm until it shall form a reservoir hold-ing approximately 60,000,000 gallons, a total reservoir capacity of 180,000,000 gallons. To continue the 16-inch main from where it now ends near the house of Samuel Sargent, from thence along through West Brattleboro to Western avenue, to the top of High street in the village of Brattleboro. This will be laid along the same line that the present six-inch main of the Chestnut Hill Reservoir company runs. The six-inch main will be removed as the 16-inch one is laid, thus giving us the six-inch pipe to use eisewhere. Something over 14,000 feet of six-inch pipe will be released for other use. I shall lay a 10-inch pipe from Western avenue down Union street to the junction of Frost and Elliot and Birge streets. I shall lay a six or eight-inch main from Western avenue, at Croaby street, down Crosby street and through West street or the the house of Samuel Sargent, from thence avenue, at Crosby street, down Crosby street and through West street or the Brook road, to a point opposite Holden & Martin's mill at the Leahy place: Then I pian, if permission is obtained, to divide and lay it across Whetstone brook, by the Holden & Martin mill, through the extension of Birge street to the corner of Estey and Birge streets, near the Estey Organ shops, and through Brook road to Frost street. I plan to replace of Estey and Birge streets, near the Estey Organ shops, and through Brook road to Frost street. I plan to replace the four-inch pipe which now runs from the corner of Oak street to the town hall with a six-inch pipe. There is now an eight-inch main from the top of High street down Green street through Church and Elliot streets. There is now a sixinch main from the top of High street hill down High street to the junction of High and Oak streets. I plan to lay a 12-inch pipe from Wells fountain to the town hall down Main street, across Whetstone brook to the junction of Vernon street: And to lay a 10-inch pipe from the corner of Main and Flat streets through Flat and Frost streets as far as the Holden & Martin and Smith & Hunt factories, and an eight-inch main thence along Frost streets. I plan to replace the four-inch pipe which runs out South Canal street with a six-inch pipe, and to make the two or three other

ern avenue through Crosby and West streets or Brook road to Birge street extension to the junction of Estey and Birge streets, there to connect with the distributing system of the village: A 10-inch main from Western avenue through University of through Union street to the junction of Elliot and Frost streets where it will connect with the distributing system of the village; an eight-inch main from the top of High street hill through Green and Elliot streets to Main street, where it will connect with the distributing mains of the village: A six-inch main down High street to Main street to connect with the distributing mains. It will be seen that the area of these pipes will take the flow of the 16-inch pipe fully and bring it to the village by various lines to size faith validate. fully and bring it to the village by various lines to give fairly uniform distribution throughout the village and protect against any contingency of breakage in any one of the pipe lines. I am informed by the engineers I have employed to go over this, that the water spstem, with this new supply and these changes in pipe lines, will be first class and will furnish ample service for fire service and an ample supply of water service and an ample supply of water for Brattleboro's present needs, and anything that can be expected for the future. I shall take up the six-inch line leading from the pumping station to the reservoir, thus releasing 6700 feet of six-inch that the state of six-inch that the six-inch that of six-inch pipe. After all these changes are made there will be left on hand something more than 14,000 feet of six-inch pipe to use for future development and extensions of the water system. If it is desired at any time to run a larger main on Birge street in front of the Estey Resolved, that action be taken by said Organ factory, that can easily be done, corporation to construct and purchase a sthere will be at the junction of Estey water system to be owned and conducted and Birge streets three separate lines of and Hirge streets three separate lines of six-inch pipe connecting with the 16-inch main to supply this larger pipe. I have afready contracted for the pipe to do all this work. Your committee will see that in making these changes we shall be able to use to quite an extent pipe which we already own, since we shall take up and have on hand the six-inch pipe for the Guilford street line and for the Canal street and Brook road. six-inch pipe for the Guilford street line and for the Canal street and Brook road line and for the other short lines of sixinch pipe which are required to make the above alterations. We shall take up and have to use again the eight-inch pipe which will be required for the line from Smith & Hunt's factory to the junction of Elliot and Frost streets.

As was stated in my behalf by Mr. Fitts at the public meeting. I very much desire to complete this system according to this plan, before the village takes it over, if the village desires to take it at any time. I am ready and willing to

On being put to a vote Mr. Galvin's any time. I am ready and willing to complete it according to the above plan and then turn it over to the village if the village desires to purchase at a fair price, and if the village authorities can-not agree with me as to the price, I am willing to leave it to a court's commission to determine, and will abide by the result.

If, however, the village desires to take over my water system at once, and before the new development is completed. I am willing it should be done, and am willing to leave the price to be paid to a court's commission, provided I can be assured that the village is in some way bound to abide the decision, as I am willing to be bound.

If the village awaits the completion of my system, I shall take no steps of any nature, by legislation or otherwise that will change in the least the privileges or opportunities that could now be exer-cised by the village in acquiring any water system. I only ask that if the vi-lage seeks additional legislation, my inter-ests may be fairly considered and pro-

Yours truly, GEO. E. CROWELL.

Mr. Vinton said: "Your committee are of the opinion that if the village votes favorably on municipal ownership to-night the following plans are open for our consideration:
"First: To negotiate with Mr. Crowell

"First: To negotiate with Mr. Crowell for the present incomplete system.

"Second: To await the completion of the present system, made in accordance with the terms of Mr. Crowell's letter that has been read here tonight, and if the system is satisfactory to the village, negotiate for the same on such terms as the village may deem best.

"Third: To take measures to install an entirely new system."

entirely new system. George L. Dunham said that the vil-lage ought not to take the present sys-tem as it is insufficient, that it did not want to take an incomplete system, and that it did not want an entirely new systhat it did not want an entirely new sys-tem. There was only one thing to do, he said, to wait until Mr. Crowell can go ahead and complete his system and then see what is to be done. He offered a res-olution to the effect that the village adopt the second plan, wait until Mr. Crowell has completed his system and then ne-gotiate with him.

has completed his system and then negotiate with him.

Mr. Galvin questioned whether the
Crowell system is what the village wants
and objected to the appointment of a
court's commission, saying that there
were men of sufficient judgment in the village. I act without betreference. lage to act without intereference. Mr. Galvin had a resolution to read, but Mr. Dunham said that in the resolution which he (Dunham) had presented nothing was said about a court's commission and that Mr. Galvin's resolution was out of order. Mr. Galvin was given the floor, however, and he read this resolution:

"Resolved, that the board of water com mittee elected at the last annual village meeting ascertain the quality and quantity of the water that may be obtained for the use of the village from what is known as the Sunset Lake Water Co., including the Pleasant Valley and Stickney brook sources of sunch.

ney brook sources of supply.

"Resolved, that if upon investigation the quality is proved to be satisfactory and the supply sufficient, said committee. are hereby authorized to purchase the same for and in behalf of the village of Brattleboro, provided the same can be delivered on Main street at some point in front of the town hall under the direction of a competent engineer and to the sat-isfaction of said committee, or a majority of them, at an expense not exceeding

"Resolved, that said committee are hereby empowered to purchase for said village of Brattleboro the water system of the Chestnut Hill Heservoir Co., pro-

We, the undersigned, do hereby agree to refund the money on a 50-cent bottle of Greene's Warranted Syrup of Tar, if it falls to cure your cough or cold. We also guarantee a 25-cent bottle to prove satisfactory or money refunded. Thomas Pharmacy, J. L. Stockwell, Mark S. Mann. C. H. Grout, N. M. Batchelder, W. C. Halladay. A. L. Wheeler, A. M. Corner.

vided they can do so by paying therefor what the same is fairly worth to said village. In case they cannot agree with the Chestnut Hill Reservoir Co. as to such price it shall be appraised by a board of competent engineers, one to be selected by the committee, one by the Chestnut Hill Reservoir Co., and they two to select a third, who shall appraise the property at its value to the village as a part of a new, adequate and efficient system.

aystem.
"Resolved, that in case said committee cannot purchase by contract the water rights, franchises, = privileges, etc., of both of said companies they are hereby empowered to construct an independent system of water for the said village of Battlages of Partitions of the said village of Brattleboro at an expense not exceeding

Gathering Marked by Confusion, Forensic Sparring and Expression of a Great Variety of Opinion

After jangling two and one-half hours the adjourned village meeting to act on the report of the water committee and on the question of municipal ownership adjourned again at 10.39 Tuesday night, clared that it was not a fair or square deal to say to Mr. Crowell that if he does not take the price offered the village will put in a competing system,
Mr. Dunham read his resolution and
spoke on the lines which he had previously

rought out clearly. L. F. Adams said the question was not as to whether we want the system, but simply as to the method of procedure.

Considerable forensic sparring followed between J. L. Martin and C. C. Fitts on the possibility of the village being en-joined by Mr. Crowell from putting in a competing system, and the question of equity with the water works now and when the Sunset lake system is com-pleted.

John Galvin spoke at some length and said that the resolution contemplated giv-ing Mr. Crowell above his equity. Mr. ritts said the village could not fix the price that way, that if the village wanted to take Mr. Crowell's properties under the act of 1892 he would say "amen" to it. C. H. Davenport took up at some length the probability of litigation and spoke in favor of Mr. Calvin's resolution spoke in favor of Mr. Galvin's resolution. E. W. Gibson thought the cost by court's commission would be more than is just to the village, as the earning capacity of the water system will not be greatly in-creased by the additional expenditure. F.

creased by the additional expenditure. F. W. Childs thought Mr. Dunham's proposition fair alike to Mr. Crowell and the poor taxpayer, and at his request Mr. Dunham reread the resolution and explained again that an affirmative vote would have nothing binding upon the village. When the yea and nay vote was called the result was clearly yes, but Chairman Gordon was undecleded, and cries of "ballot!" ballot!" went up all over the hall.

over the hall.

Then the hubbub began, and there was Then the hubbub began, and there was a Babel of voices, nearly every one in the hall indulging in talks. The question of whether the committee favored Mr. Dunham's resolution was raised, and Mr. Gibson said the committee was not favoring any proposition as a committee, W. H. Vinton declared that when the reports were accepted the committee's work was finished. "There is no committee in ex-"There is no committee in ex-

istence," was his declaration.

There was a rush front to the ballot box, but it was found after a few minutes that a part of the check list was missing. Suggestions of dividing the house and of going ahead without the check list, of adjourning, etc., flew thick and fast, but it was decided to let the voting continue without the check list. When the result was announced it was found that Mr. Dunham's resolution had been voted down, the figures being yes 108, no 142. The voters were pretty tired and many of them disgusted at the "scatter sheep" style in which the meeting had been running, and there was no opposition to L. D. Taylor's motion to adjourn.

Three of the largest financial institu-Three of the largest financial institu-tions in the West—the Chicago National bank, the Home Savings bank, and the Equitable Trust company, all of them controlled by John R. Walsh of Chicago, and in great measure owned by him—sus-pended operations Monday. Their af-fairs will be liquidated as rapidly as pos-sible, and they will go out of business. Mr. Walsh, who was the president of the Chicago National bank and of the Fourt-Chicago National bank and of the Equitable Trust company, and all the other officers and all the directors of the Chic-

ago National bank have resigned.

The immediate cause of the collapse of the Walsh institutions is said to be the very large amount of money which they have loaned to his private enter-prises, notably the Southern Indiana rallway, and the Bedford Quarries company of Indiana. Mr. Walsh says that if he could have had a little more time and been left untrammeled in his operations he could have saved his banks, and made enormous profits for himself and his as-sociates. He bases this statement on his estimate of the value of the bonds of the Southern Indiana Railway company. The liabilities of the three institutions are es timated in the aggregate at \$26,000,000.
Against this amount, the banks and the trust company have resources that are

The directors of the two banks, as well as Mr. Waish, who has turned all of his private property, as well as that standing in the name of Mrs. Walsh, have pledged real estate and securities valued at \$5,000,000, making a total in assets of \$29,000,000, estimating the railroad bonds at \$8,000,000, against \$26,000,000 Habilities.

"Franklin in France."

Now that the American nation is preparing to observe the two-hundreth an iversary of the birth of Franklin, it is welcome announcement that the Janmry Century will publish an estimate of "Franklin in France" from the pen of the late John Hay—a study prepared some years ago for delivery in Chicago, then laid aside because of ill-health. This witty and scholarly review of Franklin's service abroad will be illustrated with the Cochin portrait, made in France in 1777. Speaking of Frankin's appearance at this time, Mr. Hay says: "His fur cap and spectacles became as familiar ; face of the king on the louis d'or.

"The Lucin Cut-Off."

The so-called Lucin cut-off, the twelve mile trestle and twenty-mile roadway across Great Salt Lake, is ranked by engineers as the monument of one of the arce in railway construction history. Its completion has lopped off forty-three miles in distance, avoided heart-breaking grades, eliminated curves, saved hours of time and untold worry and vexation, and is reducing expenses of operation more than enough to pay interest on the whole cost twice over. But these results were secured at an immense cost of labor, money, and grit. The history of this remarkable feat of engineering is told in the January Century by Oscar King Davis.

The Page Calendar.

One of the handsomest calendars for 1906, is, as usual, the one put out by Car-roll S. Page of Hyde Park, the largest andier of green calf skins in the world It is a 12 sheet calendar 21 by 29 inche The top half of each alternate sheet con tains half tone pintes of Mr. Page's hide nouses, receiving, grading, packing rooms, stc. Until the supply is exhausted, copies will be sent to any address on receipt of 10 cents to pay in part the expense

Agnes King, 17, had her hair torn out Agnes king. It. and her hair torn out by the roots and her scaip loosened while at work in the Queen City cotton milis in Buriington Thursday. She was comb-ing her hair, holding it above her head, when her hair caught in the shafting. It is thought she will recover.

#### IN OUR OWN STATE

GEN. W. Y. W. RIPLEY DEAD.

End Came Suddenly at Rutland Saturday to a Distinguished Veteran of the

Gen. W. Y. W. Ripley of Rutland died suddenly of heart trouble at his home about 4.30 o'clock Saturday morning. He was in his usual health Friday night. Gen. Ripley is survived by a wife, one on, Thomas Ripley, of the state of Wash-

ington, one daughter, Mrs. John C. Pease of Boston, a brother, Edward Ripley of New York city, and two sisters, Mrs. Charles Parker of Vergennes and Mrs. Julia C. R. Dorr of Rutland, the famous

Vermont poet.

William Young Warren Ripley was born in Middlebury Dec. 31, 1832. He was educated at the Troy Conference academy. Poultney, and at Lima institute, Lima, N. Y. He entered the United States military service as captain of Co. K. 1st Vermont Volunteers, May 8, 1861, under the first call of President Lincoln for 75,000 troops, serving until the expiration of the resiserving until the expiration of the regi-ment's term of service. In the following autumn he joined the 1st regiment, United States sharpshooters, and was commis-sioned fleutenant-colonel Nov. 29, 1861, serving with his command with dis-tinguished gallantry until he fell serious y wounded at the battle of Malvern hill. This ended a brilliant military career. for, although many times tendered promotion and important commands, disability caused by wounds received in action compelled him to decline all. He was commissioned by Gov. Frederick Holbrook, in August, 1862, colonel of the 10th Vermont Volunteers. In 1861, he was a second of the 1861 of the mont Volunteers. In 1864 he was missioned major-general of the Vermont state milita, which position he held until the policy of the state in regard to its militia was changed. In 1868 he was a district delegate to the Republican national convention. He was elected mayor of Rutland in 1899. For many years he was engaged in the marble business un der the firm name of Ripley Sons. The business was sold to the Vermont Marble Co. in 1889. He had been a director of the Rutland County National bank since 1867 and president since 1875, when he was selected to succeed his father.

#### Newspaper Men at a Banquet.

An informal gathering of newspaper men was held at the Berwick House, Rut-land, Saturday evening, about 30 being land, Saturday evening, about 20 being present at the banquet. At the after-dinner exercises F. E. Parsons, business dinner exercises I. in the manager of the Rutland Herald, presided.
The principal addresses were delivered by John B. Shale, president of the Pub-John B. Shale, president of the Pub-lishers' Press association, and Edward J. Bowen of Philadelphia, Others who spoke were W. C. Belknap and F. H. Kim-ball of Bellows Palls, H. L. Hindley of Ludlow, M. W. Wilson of Bristol, E. L. Cowles, G. M. Goddard, and L. H. Vellow, M. W. Wilson of Bristol, E. L. Cowles, G. M. Goddard, and J. H. Kellette of the Rutland Herald, and C. P. Harris of Rutland. Through the courtesy of Mayor J. F. Manning of Rutland, who was present at the banqeut, every news-paper man was presented with a marble paper weight made by the Columbian Marble Co. During the afternoon and early evening C. T. Fairfield, editor of the Rutland News, held open house. His beautiful home was thrown open to the newspaper men and a lavish hospitality

Vermonters Meet in Manchester, N. H. The Vermont association of Manchester, N. H., held its annual election of of-ficers Friday evening. The secretary's report showed a membership of 176, and the treasurer reported that there was a balance of \$444.23 in the treasurey. The following officers were elected: President Frank H. Challis; vice-presidents, W. M. Rockwell, G. G. Skinner, and Albert E. Rockwell, G. G. Skinner, and Albert E. Dodge; secretary, Mrs. Mary V. Toble; treasurer, H. Fox Davis; executive committee, Mrs. A. W. Jones, Mrs. W. M. Rockwell, Mrs. Florence Patten, Miss Ethel Eastman, Mrs. Gage, Miss Mary Cawley, and Mrs. Minnie Prime; auditors, A. L. Partridge and O. D. Carpenter,

Capt. G. A. Curtice of Concord, N. H. succeed Hugh Henry of Chester United States pension agent for the Concord agency, which embraces the states of Vermont and New Hampshire when the latter's second term expires next month. This was decided at a meeting of members of the Vermont and New Hampshire congressional delegations with the President Monday, when it bewith the President Monday, when it became known that the President practically agreed four years ago when Mr. Henry was appointed for a second term, that at the end of it the office should go to a New Hampshire man.

Gov. Bell will pardon Walter Brace, 17, who was sentenced to the state prison a Windsor from St. Albans for petit larceny. The young man is suffering from tuber-

KEEP THE KIDNEYS WELL.

Health is Worth Saving, and Some Brattleboro People Know How to Save It. Many Brattleboro people take their lives their hands by neglecting the kidneys when they know these organs need help. Sick kidneys are responsible for a vast amount of suffering and ill health, but there is no need to suffer nor to remain in danger when all diseases and aches and pains due to weak kidneys can be quickly and permanently cured by the use of Doan's Kidney Pills. Here is the statement of a Brattleboro citizen who has reclaimed good health by the use of this remedy

J. C. Montrose, carriage painter, of ; Canal street, Brattleboro, Vt., says: "My experience with Doan's Kidney Pills dates back to some six years ago when I could hardly attend to my work on account of my kidneys being so badly affected. There was a dult pain across my kidneys and if I straightened quickly after stooping sharp twinge would catch me and the pain would be so severe that I could hardly keep from crying out. Headaches and spells of dizziness were frequent and a weakness of the kidneys caused too fres quent action of the kidney secretions particularly annoying at night and disturbing my rest. I heard about Doan's Kidney Pills, sold here by F. H. Holden the druggist, and so I commenced taking them. I have tried many different remedies but nothing ever did me so much good as Doan's Kidney Pills. They not only cured the herdaches and pains through my back but they also regulated the action of the kidney secretions. Since then I have recommended them to scores of peo-
